Easy Fleet

# The technology for street sweepers by Comac that enables the digitization of sweeping operations

The Easy Fleet system enables **optimal management** of the work of Comac street sweepers. Thanks to digitization, it is possible to communicate with the machines, collect data and transform this into meaningful, useful information for the management of cleaning operations, whilst creating value for the business.

Easy Fleet can be accessed in real time from any location, and can be viewed on a smartphone, tablet and PC. In this way, the user can access a **comprehensive, up-to-date**, real-time overview of the sweeper. This system enables the coordination of the machines to be improved and the performance to be optimized in order to **reduce costs of ownership**.

## BENEFITS

- Money savings and increased productivity.
- The sweeper can be controlled remotely, for prompt intervention in case of unforeseen events.
- Enables efficient programming of periodic technical maintenance in order to preserve the value of the sweeper over time.
- The ability to check for faults and replace damaged components enables a more flexible approach to maintenance operations under warranty.
- The collection of data and statistical information allows the management of street sweepers to be improved, thus increasing their service life.

Easy Fleet  
is available for:

**hp4000**  
**hp6000**
